Manulife Asia Lands a New Guinness World Records™ Title!

MANILA - Manulife Philippines, Manulife Business Processing Services (MBPS) and Manulife IT Delivery Center Asia (MITDC) are excited to announce that its #winningteam in Asia has set a new world record!

On 9 February 2023, more than 500 colleagues across 12 of Manulife's offices in Asia, including 100 in the Philippines, came together to build trophies out of interlocking building bricks, with awards for the fastest finishers in each market.

The event, which symbolizes Manulife's ambition and growth, was confirmed by Guinness World Records™ to represent a new record for the "most people building interlocking brick sculptures online and in a single venue simultaneously."

"The Guinness World Records™ attempt was a fun and exciting way for our colleagues to engage with our ambition to be the leading Pan Asian life insurer. We were delighted to see so many colleagues come together for this record-breaking activity and we hope this will help to supercharge our teams towards another big year in 2023," said Rahul Hora, Manulife Philippines President and CEO.

Congratulations to Manulife Philippines' Jonathan Feleo, MITDC's Ron Del Rosario and MBPS' David Andrew Beltran for being the fastest to complete the sculpture in the Philippines.

Manulife has operated in Asia for more than 125 years and grown to be one of the biggest life insurers in the region. Manulife was named as one of the "Best Companies in Asia to Work For in Asia 2022" in five Asian markets because of its excellence in promoting colleague engagement and workplace culture.
